

ABOUT THE BOOK

This book highlights some of the areas that are key in leadership that will help motivate, challenge and transform the mindsets and actions of today's leader.

Nehemiah was a biblical character who occupied the leadership position of a governor in the land of Judah. His life, manifesto and work during the time he was governor brought unprecedented positive reformatations to the poverty stricken people who were living in the land of Judah at that time. His is a story of true success in leadership inspite of the enormous challenges he faced.

Nehemiah is a man every ruler can learn from and emulate since few leaders today have an exemplary role model whom they can look up to. The book of Nehemiah offers great insight and a firm foundation to anyone who aspires to be a successful ruler and much needed reflection to those who are already in leadership because it is based on one of the greatest governors or state man who ever lived.
